Artificial Intelligence Governance Program

ROCKCYBER

Building and maintaining a robust AI governance program is essential for responsible development, deployment, and management of AI systems. At RockCyber, we offer a comprehensive AI Governance Program aligned with the White House Blueprint for an AI Bill or Rights, UNESCO AI Ethics Principles, OECD Framework for the Classification of AI Systems, IEEE Ethically Aligned Design with Autonomous Intelligence Systems, the EU AI Act, among others.

The Benefits of RockCyber's AI Risk Assessment Service

Maintaining AI Inventory and Transparency

Maintaining a central inventory of AI applications and a repository of algorithms enhances visibility and transparency in your AI projects. This practice builds trust and accountability, providing stakeholders with a clear understanding of your AI operations

Building AI Assessment Process

Our program leverages external frameworks such as the NIST AI Risk Management Framework and ISO standards. By collaborating with internal stakeholders, we help you establish an organizational strategy, define acceptable risk levels, and develop effective mitigation strategies.

Leveraging Existing Structures and Stakeholders

Utilize your existing governance and compliance structures. Our program integrates existing stakeholders to adapt established practices and lessons for AI governance. Clearly defined roles and responsibilities ensure that all personnel understand their specific roles, where to seek assistance, and how to empower themselves in the AI development and release process.

Proactive Risk Management

Understand and manage your AI risks proactively. Our program highlights potential threats and weaknesses, allowing you to address them before they can be exploited. This proactive approach helps reduce the likelihood of incidents and associated costs.

Elevate your organization's cybersecurity resilience with RockCyber - where expertise meets tailored solutions for enduring cybersecurity excellence. Beyond regulatory checkboxes, our comprehensive approach safeguards your critical assets, enhances overall security posture, and builds lasting customer trust.

Embrace the future of cybersecurity with RockCyber - where preparation meets innovation to safeguard your organization's digital assets and reputation.

How it Works

1. **Initial Consultation:** We begin with a consultation to understand your business, its AI applications, and specific security concerns.

2. **Comprehensive Evaluation:** Our experts conduct a thorough assessment of AI considerations in your existing governance structures..

3. **Implementation Support:** We assist you in implementing the recommended governance structures and processes to ensure compliance and effective AI management.

4. **Ongoing Support:** We provide ongoing support to manage your AI governance program, update governance frameworks as needed, and ensure continuous improvement.
